Reason for allowance

The following is an examiner's statement of reasons for allowance: the applicant's amendment filed on 08-22-05 overcomes the technical deficiencies and the prior art of record. The prior art of records (USP. 4,384,277) fails to teach or fairly suggest a method for adjusting a level of a voltage generated internally to an integrated circuit device comprising generating control signals as a function of states of one or more non-volatile storage elements, wherein the states are determined based on an output of a voltage comparator comparing the voltage at the output node to an external reference voltage as called for in claims 1 and 7; a memory device comprising a plurality of non-volatile elements wherein the plurality of switches are controlled by signals generated by the states of one or more non-volatile storage elements, and wherein the states are determined based on an output of a voltage comparator comparing the voltage at the output node to external reference voltage as called for in claim 13; a memory device comprising at least one additional switch to selectively bypass one or more of the serially connected resistive elements, wherein signals generated based on the fuses control the plurality of switches and additional switches as called for in claims 26 and 28. Therefore, claims 1, 5-7, 10-13, 15-20, 26 and 28 are presently allowed.

Conclusion

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
